

CASE STUDY

Seton Recreational Facility
(YMCA)

The Challenge

The YMCA is a renowned charity that is dedicated to the improvement of the health and wellness of communities with over 1,700 locations across Canada. The Seton Recreational YMCA (o/a Brookfield Residential YMCA at Seaton) is a brand new 330,000 sq. ft. recreational facility located in Calgary and is recognized as the largest YMCA in North America. This vision for this building was to provide the community with opportunities for learning through recreation, fitness, arts and performance. The plan included space for an aquatic facility, personal fitness facility, licensed childcare, courts and arenas as well as a full-scale public library.

The Solution

The team looked to Standard Metal Hardware to supply a wide assortment of commercial door hardware products including kick plates, door stops, flush pulls, door pulls and more. Reliability was of the utmost importance for this large-scale project. The customer trusted Standard Metal Hardware to fulfill this large multi-phased order because of our long history of reliability and on-time shipments. The team received their hardware in a reasonable timeframe and were able to complete the project both on time and on budget. The hardware now sits throughout this state-of-the-art facility and blends seamlessly with their modern design. The team at Standard Metal Hardware were proud to be a part of such a high-profile community project and what is now the largest YMCA in North America.
